

Press Release

Kehl, 6th of July 2022

Bürstner's new developments of caravan model range for 2023

The most important changes are the caravan model range Premio and Premio Plus facelifts, as well as a Bürstner app for monitoring the Averso Plus.

Kehl. Bürstner is dedicating the upcoming season to model redesigns. The Premio and Premio Plus have been given a facelift, and the digital app "My Bürstner", which makes it possible to keep an eye on important vehicle data via a smartphone, will now be offered from the Averso Plus model range onwards.

New: Entry-level model range Premio Life with a Knott chassis

The Knott chassis is a new addition to the entry-level caravan Premio Life. It is equipped with stabilisers with a load capacity of up to 1,000 kg as a standard feature, as well as a cover for the hitch damper. Optional extras are the new stabilisation system ETS Plus, the new trailer control system, and a hitch cover. In future, the entire model range will be equipped with compressor refrigerators, and the 490 TK layout has been redesigned and can now be ordered with a 142 l compressor refrigerator. Furthermore, the lower bunk bed is a folding bed and optimises the access to the garage below. In combination with an optional third bunk bed on top, the optimum utilisation of the available space creates up to seven berths in a layout with an overall length of only 714 cm.

Facelift for the Premio and the Premio Plus

These model ranges represent the mid-range price segment, and their interiors have been completely redesigned. The Brava furniture finish can now be combined with four high-quality upholstery fabric versions. In the Premio model range, the offer has now been extended from nine to ten layouts with the addition of the new 455 TS, a compact touring caravan with a double bed and a cosy curved lounge. The new, optionally available Comfort Shower Pack creates a shower cabin that measures approx. 67 x 60cm with shower panels, a shower cabin door and a valve, hose and handset.

Averso Plus now comes with the "My Bürstner" information app as a standard feature

From the Averso Plus model range onwards, Bürstner makes it possible to monitor various charge levels via smartphone for the first time. Sensors for monitoring the voltmeter, for example, are standard integrated features. Other functional features such as being able to monitor the water level and the habitation temperature, check whether the windows are closed or ensure that the tow weight is not exceeded are optional offers. The system can be extended with various individual sensors. The System Information Unit (SIU) transmits the data to the "My Bürstner" app, which is useful for the owner. All they have to do is to simply install the "My Bürstner" app on a smartphone (iOS + Android).

These new features will be offered from the 2023 season onwards and will be on show for the first time at the Caravan Salon 2022 in Düsseldorf in Hall 6 at stand D03.
